

# Calendar Notify

Effortlessly manage your day. Know what's next, get more done, never forget anything.

[www.calendarnotify.com](http://www.calendarnotify.com)

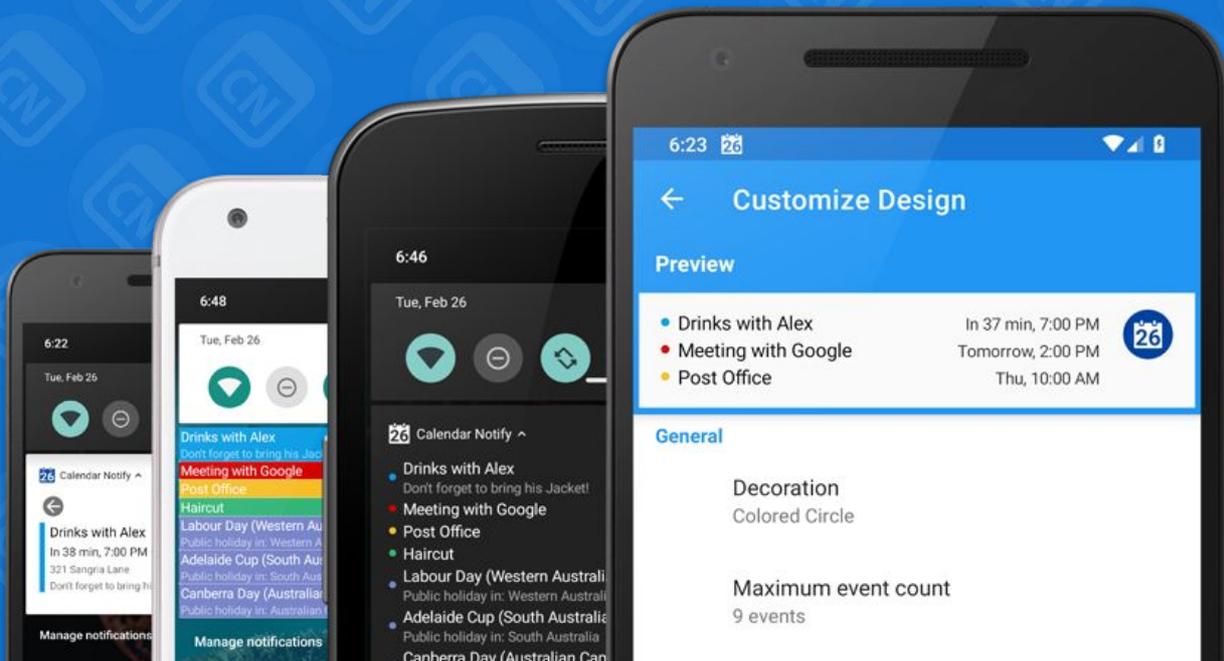

## About

Calendar Notify is a companion app for your existing Android Calendar.

Calendar Notify puts your Android calendar events front and center in the status bar, the lock screen or in a widget.

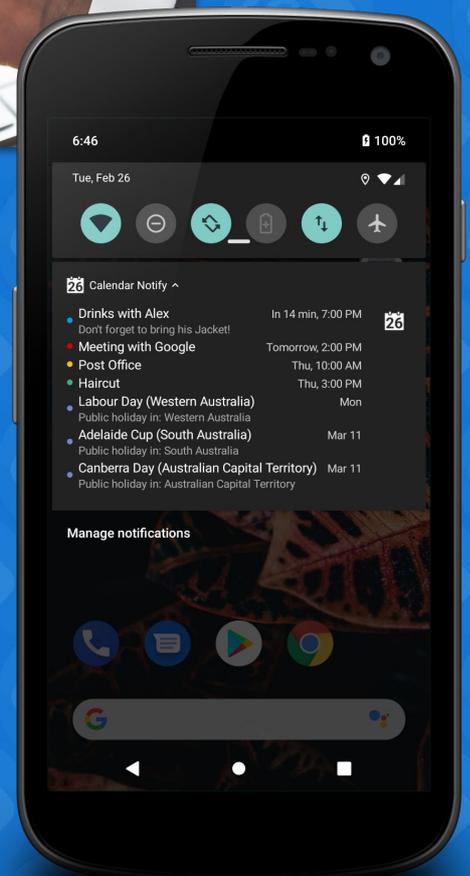

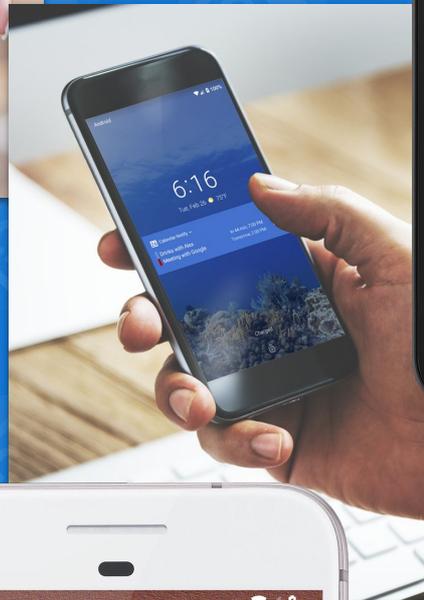

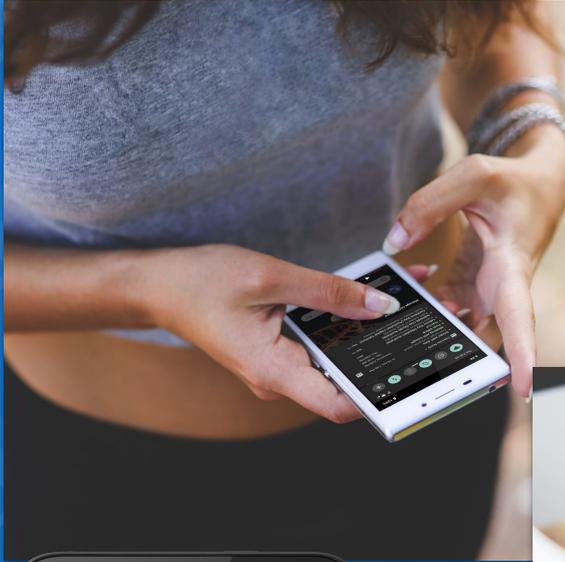

At a glance access to your agenda, roster and meetings from everywhere on your Android device.

Completely customize appearance and layout to match your life and device.

# Screenshots and media

Additional assets are available in the [presskit](#)

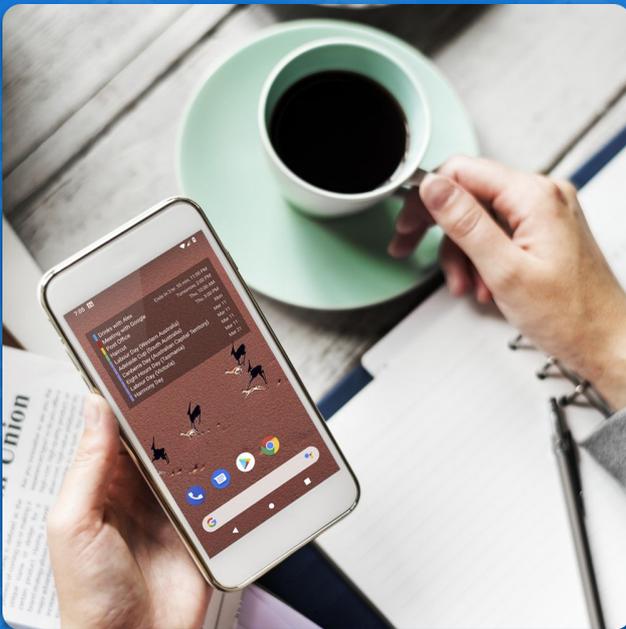

# Developer Background

Calendar Notify was created by Australian Indie developer Cliff Cawley.

Cliff Cawley has a long history of development in commercial, video games and indie development.

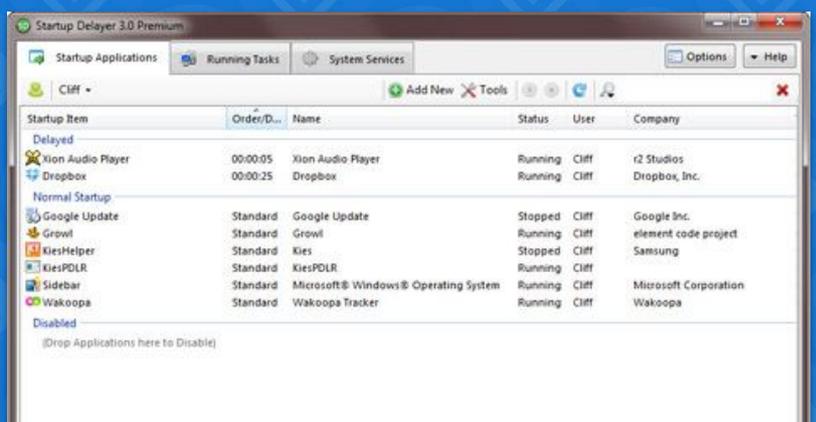

[@CliffCawley](https://twitter.com/CliffCawley)

He's worked on projects such as Battlestar Galactica for Xbox/PC, Happy Feet 2 and Guardians of Ga'Hoole.

His career started in 2000 for Australian games studio Auran on the popular Trainz franchise.

He's worked on a variety of software applications, a selection of which are available at [www.r2.com.au](http://www.r2.com.au) (including the popular Startup Delayer and Xion Audio Player)
